Bubbling may occur during the fabrication process due to the application of adhesive between acrylic panels. This is a normal and anticipated outcome.

The final appearance of the compass maze is expected to include visible bubbling as a result of this process which will have no effect on product performance.

Designed for Discovery & Development

Compass Maze invites children into a cooperative and challenge-based play experience where focus, balance, and strategy come together. It allows children guide the ball through the maze, building critical social and thinking skills along the way also promotes teamwork when with multiple players.

Play Activities

Socialise

Sensory
